Summary:

RoHS Impinj Endpoint die, supplied by Impinj, Inc., are RoHS compliant, based upon the analysis results. Since all part numbers within these four families meet the Directive 2002/95/EC (RoHS), 2011/65/EU (RoHS2), and 2015/863 (RoHS3), special part numbers are not required.

REACH The products listed do not, to our current knowledge, contain substances above the legal threshold that are on the Candidate List of Substances of Very High Concern (SVHC). Our company’s intention is that all products sold to our EU and EEA customers by our legal entities in Europe are compliant with REACH 241 regulatory requirements.

Detail:

RoHS Table 1 identifies the environmentally banned substances related to the Directive 2002/95/EC (RoHS), 2011/65/EU (RoHS2), and 2015/863 (RoHS3). Impinj products do not intentionally contain these substances beyond trace element amounts.

REACH

Our Company's intention is that all products sold to our EU and EEA customers by Our Company legal entities in Europe (2) are compliant with REACH 241 regulatory requirements.

REACH requires registration for individual substances (1) (on their own or in preparations (3)) greater than one metric ton per year produced or imported.

Each importer is responsible for his own compliance with REACH 241; and Our Company products bought from a supplier outside of EU/EEA may not necessarily be compliant with REACH 241 requirements.

Most of the products we sell do not, to our current knowledge, contain substances above the legal threshold (4) that are on the Candidate List of Substances of Very High Concern (SVHC substances) as published on the ECHA website on June 27, 2024. For those few products that contain an SVHC, we notify our direct customers and distributors to inform them of the presence of an SVHC and our plans to address the issue.

To fully understand the obligations that you as our customer have under REACH, we recommend that you consult the REACH website at http://echa.europa.eu/home_en.asp.

- (1) Substance: a chemical element and its compounds in the natural state or obtained by any manufacturing process, including any additive necessary to preserve its stability and any impurity deriving from the process used, but excluding any solvent which may be separated without affecting the stability of the substance or changing its composition (REACH, Article 3.1).
- (2) This includes the Our Company legal entities in the EU/EEA, as well as Our Company de Nemours International Sàrl and Our Company International Operations Sàrl.
- (3) Preparation: means a mixture or solution composed of two or more substances (REACH, Article 3.2).
- (4) Inclusion of a substance on the Candidate List may impose immediate legal obligations upon companies whose chemical products or articles contain more than 0.1 wt% of the substances. You can find more information about these obligations on the ECHA website:
http://echa.europa.eu/chem_data/authorisation_process/candidate_list_obligations_en.asp.

Additional Substances not addressed by RoHS or REACH Directives:

Table 2 identifies additional substances currently NOT incorporated into the Impinj Endpoint IC products by design. This list includes items that are not intentionally added but may not list impurities or trace elements within individual components of any substance.
