Product Change Notification: Impinj xPortal Gateway Brazil Regulatory Certificate Expiration

Dear Customer,

This is a formal notification that Impinj will not renew the Brazilian regulatory certificate for the Impinj xPortal RAIN RFID gateway. The existing certificate will expire on November 30, 2020. The lack of a valid certificate will prevent the importation of Impinj xPortal gateways to Brazil starting November 30, 2020.

The objective of providing this notice is to allow for appropriate planning. This notice also provides details about an alternative Impinj gateway product for your consideration.

Applicable Products

Impinj Product Name	Impinj Part Number
Impinj xPortal gateway (GX1)	IPJ-REV-R640-GX1

Timing

The Impinj xPortal gateway Brazil certificate will expire on November 30, 2020.

Replacement Products

The Impinj xSpan RAIN RFID gateway is the recommended product replacement in many use cases. Like the Impinj xPortal gateway, the Impinj xSpan gateway features an integrated phased array antenna system for inventory and transition use cases. Both gateways share the same software development kits and software utilities. The xSpan gateway (IPJ-REV-R660-GX11M1) is certified for operation in Brazil. Please refer to the [Impinj Support website](#) for detailed Impinj xSpan gateway information.

If you have questions, please contact your Impinj salesperson or the Impinj Support Team (support@impinj.com).

Best regards,

Matt Branda
Vice President of Product Management
